

SUPPORT YOUR CDI CHAMPIONS

with

NEW CHARTWISE 2.0 PHYSICIAN ADVISOR FUNCTIONALITY

The success of all CDI programs relies on the participation and support of physicians, and the Physician Advisor is an integral part of ensuring that CDI specialists and clinicians are on the same page for success. In recognition of this increasingly important role, ChartWise 2.0 has added functionality to help your Physician Advisor and CDI staff work better, together:

Manually or auto-assign admissions to your Physician Advisor based on DRG, diagnosis, and more

Use Notes to communicate directly within the record with your Physician Advisor—no separate emails needed

Enable your Physician Advisor to track admissions of interest from their own dashboard view

Obtain reporting on number of admission escalations and cases reviewed by each Physician Advisor

Support Physician Advisors who may be contracted to multiple institutions as the designated “escalation” Advisor

IF IT'S TOO GOOD TO BE TRUE, IT MUST BE CHARTWISE!
