NO ONE MOVES LIKE YOU DO. YOU PUSH LIMITS AND TAKE CHANCES. YOU NEED A BRACE BUILT EXACTLY FOR THE WAY YOU PLAY.

Never hold back. Confidence is what gives you that edge. It's knowing that you're protected by a market-leading knee brace custom-made exactly to your unique needs – so you can play without limits. Confidence is why top professional athletes in nearly every sport choose DonJoy.

DonJoy custom knee braces fit like they were made just for you – because they are. You'll be personally measured and fitted by a specially trained bracing expert. Using our advanced proprietary algorithms, we custom-make your brace to help support and protect you everywhere you wear it, whether you're training, rehabbing or playing to win.

DonJoy can build and ship custom knee braces within 24 hours, so you can get right back in the game.

IT'S NO SURPRISE THAT DONJOY IS THE MOST PRESCRIBED CUSTOM BRACE IN SPORTS.

We study body mechanics and listen to athletes. We consult physicians and push the envelope of technological innovation. Our braces combine the most advanced technology, strongest materials and highest craftsmanship to help protect ligaments.

For more than 40 years, the best players have trusted DonJoy custom knee braces for unmatched, uncompromising ligament protection.

Founded in 1978 by a pro football lineman in his California garage, DonJoy has been a leader in athletic knee braces ever since—and we continue to be at the forefront of performance.

Using our advanced proprietary algorithms, we custom-make your brace to help support and protect you everywhere you wear it, whether you're training, rehabbing or playing to win.

DonJoy can build and ship custom knee braces within 24 hours, so you can get right back in the game.

A DONJOY FIRST: 4-POINTS-OF-LEVERAGE SYSTEM

The ACL prevents forward movement (anterior translation) of the lower leg and stabilizes the knee. ACL injuries most often happen as a result of sudden stops or changes in direction when running, jumping or landing. DonJoy was first in the market to offer the game-changing 4-Points-of-Leverage System, which is clinically proven¹⁻³ to help decrease ACL strain by at least 50%. Our groundbreaking technology combines rigid anterior thigh and posterior calf cuffs with a strategic strapping sequence to help push the femur anteriorly and apply an active constant load to help prevent anterior tibial translation and aid in protecting the ACL. By changing the strapping system, our technology helps allow posterior femoral loading for PCL injuries. And of course, all of our knee ligament braces are constructed for excellent medial support to aid MCL and LCL indications.

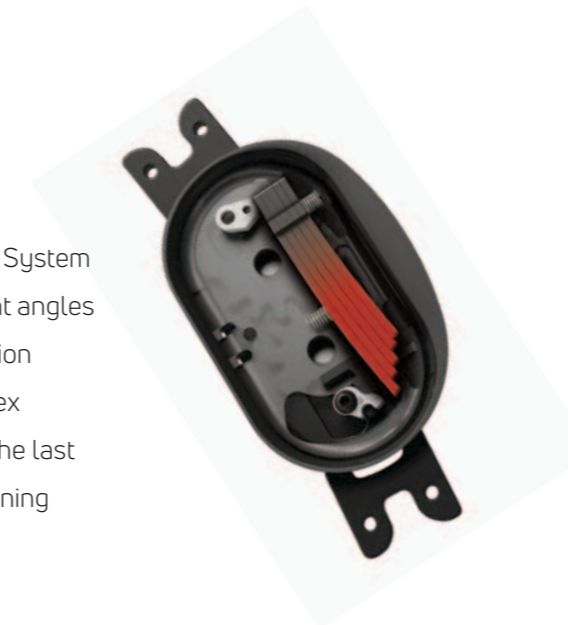

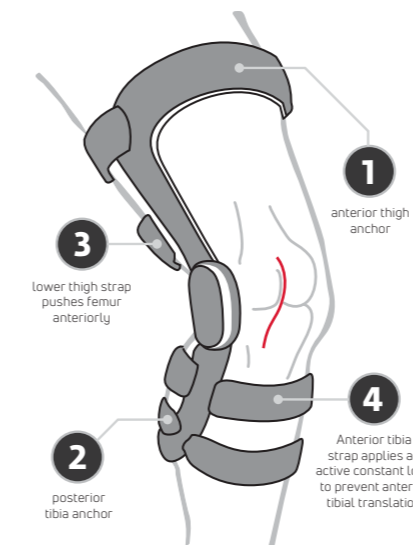

CLINICALLY PROVEN PROTECTION

DonJoy custom knee braces with our exclusive FourcePoint Hinge[®] and 4-Points-Of-Leverage[®] technology are clinically proven to:

- Help decrease non-contact ACL injury rates in both knees by 6x¹⁰
- Help decrease ACL strain by at least 50%¹³
- Help keep both knees out of the at-risk position
- Help improve joint mechanics and symmetry between both knees¹⁰

A DONJOY EXCLUSIVE: FOURCEPOINT HINGE

Only DonJoy offers the FourcePoint Hinge to enhance the 4-Points-of-Leverage System to aid additional ACL protection with NO significant performance limitations². Joint angles of less than 60° put the ACL in an at-risk position, and jump landing in full extension can lead to injury. Clinically tested hinge technology^{2,14} helps train the knee to flex and increases flexion angles during cutting and jumping. Resistance engages in the last 25 degrees of extension to help keep the knee out of the at-risk position. And training effects are retained by about 50% even when you're not wearing the brace¹⁵.

A22

The first and only all-titanium brace on the market strikes a perfect balance of strength, weight and profile. Constructed with DonJoy's 4-Points-of-Leverage System and FourcePoint Hinge technology, A22 provides powerful customized protection in a lightweight, lower-profile design.

Cushioning cells help absorb shock, add stability and enhance comfort and fit. Anti-microbial coating helps neutralize odor while increasing comfort and durability. The A22's smart engineering aerodynamically integrates straps and liners to reduce overall profile without sacrificing strength, making it the ideal lightweight option for top performance.

DEFIANCE

The undisputed market leader, Defiance is the name athletes know and trust.

DonJoy's flagship knee brace has been the world's leading custom knee brace for over 20 years. From elite professional athletes to middle-school soccer players, nearly 2 million Defiance braces have been prescribed to athletes of all shapes, sizes, ages and genders.

Made of hollow carbon fiber for strength and protection, Defiance has the greatest strength-to-weight ratio of any knee brace on the market, weighing less than 20 ounces.

Professional athletes choose Defiance for the confidence and freedom to move with zero limitations.

DonJoy can build and ship custom knee braces within 24 hours, so you can get right back in the game.

NO ONE PROTECTS LIKE DONJOY.

We don't just make braces. We vouch for them. Under the DJO Global Knee Protection Program, if you re-rupture a surgically repaired ACL while wearing a duly registered Defiance/Defiance III with FourcePoint Hinge or A22 Functional Knee Brace, DJO will pay \$750 toward the cost of your deductible.

That's confidence.

A22

The first and only all-titanium brace on the market strikes a balance of strength, weight and profile. Constructed with DonJoy's 4-Points-of-Leverage System and FourcePoint Hinge technology, A22 helps provide powerful, customized protection in a lightweight, lower-profile design.

Cushioning cells help absorb shock, add stability and enhance comfort and fit. Anti-microbial coating helps neutralize odor while increasing comfort and durability.
